

CompTIA Security +

Course Duration: 10 days

Course Overview

The CompTIA Security+ course is designed to teach students security basics and prepare them for testing to become Security+ certified. The Security+ covers many vendor neutral topics including different types of threats and attacks, networking technologies and tools, secure design and architecture, identity and access management, risk assessment and management, and finishes up with Cryptography and Public Key Infrastructure. This covered everything from the ever-expanding virtualization of various computing systems to industry management of smart devices.

Upon Completion:

Upon successful completion of this course, students will learn to:

- Compare and contrast attacks.
