ISO/IEC 27001:2022 Information Security Management System (ISMS) Lead Implementer

Course Duration: 8 days

Course Overview

This self-study training teaches you everything you need to know to be able to set up ISMS that conforms to ISO/IEC 27001:2022 in an organization. You will cover the requirements of the standard and consider the state of your organization's current information security management practices in preparation to put in ISMS. We will help you develop your skills and understanding of the practicalities involved when setting up a typical management system framework that conforms with the standard. This includes learning how to set up policies, processes and procedures for your ISMS.

Who Should Attend

- Managers or consultants involved in and/or concerned with the implementation of an information security management system in an organization
- Project managers, consultants, or expert advisers seeking to master the implementation of an information security management system; or individuals responsible to maintain conformity with the ISMS requirements within an organization
- Members of the ISMS team

Prerequisite

The main requirement for participating in this training course is having a general knowledge of the ISMS concepts and ISO/IEC 27001

Course Benefit

- Explain the fundamental concepts and principles of an information security management system (ISMS) based on ISO/IEC 27001
- Interpret the ISO/IEC 27001 requirements for an ISMS from the perspective of an implementer

- Initiate and plan the implementation of an ISMS based on ISO/IEC 27001, by utilizing PECB's IMS2 Methodology and other best practices
- Support an organization in operating, maintaining, and continually improving an ISMS based on ISO/IEC 27001
- Prepare an organization to undergo a third-party certification audit
